Professional Profile

Business Informatics student with a strong foundation in software development, enterprise systems, and IT infrastructure. Experience designing and developing web applications, implementing REST APIs, and modeling relational databases with SQL Server. Combines technical knowledge with business understanding, administrative experience, and proven ability to manage real-world operations.

Technical Skills

- Languages: Java, C#, PHP, HTML, Bootstrap
- Programming: Object-Oriented Programming (OOP), Inheritance, Encapsulation, Abstraction, Polymorphism, Algorithms, Multithreading
- Architecture: MVC, Layered Architecture, Service-Oriented Architecture, REST APIs
- Databases: SQL Server, Oracle SQL Developer, Joins, Stored Procedures, Triggers, ACID, Deadlocks
- Systems: Web servers, Mail servers, Streaming servers, OS installation, Dual boot environments
- Networking: Subnetting, Router and Switch configuration, OSPF, EIGRP, RIP, Structured cabling
- Tools & Methods: Git, Scrum, Agile, Collaborative development

Projects

- AppWebCxp – Enterprise Accounts Payable System: Designed and developed a financial web application using .NET and SQL Server, implementing MVC architecture, relational database design, and modular business logic.
- Distributed Retail System (Oracle): Designed a distributed database model simulating a multi-branch retail environment with centralized and distributed data structures.
- Risk Management System – UCR Communications Infrastructure: Participated in the analysis and design of a system to identify risks and define contingency plans for institutional IT infrastructure.

Professional Experience

- Administrative Assistant – Business Informatics Program, University of Costa Rica (2 years): Supported academic and administrative processes, managed case coordination, and provided assistance to students and faculty.
- Event Coordination – International Symposium (200+ attendees): Organized logistics including food, lodging, scheduling, and participant coordination for an international academic event, handling real-time problem resolution.

Education

- Bachelor's Degree in Business Informatics (In Progress) – University of Costa Rica
- Technical Degree in Accounting – CTP Piedades Sur
